28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):

12 hours: **Replacement personnel for engines and tractor-plov units.**

24 hours: **Replacement personnel for engines and tractor-plov units.**

48 hours: **Replacement personnel for engines and tractor-plov units.**

72 hours: **Replacement personnel for engines and tractor-plov units.**

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Extremely dry conditions make control difficult, Firefighter fatigue. Reburning due to needle fall in areas that were previously burned. Structures on along east line near Randall Crews Road are still threatened until mopup and line improvement is completed. Logging operations within the burned area is a concern for firefighter safety if they are in one of the logging areas. Logging operations have a potential to stir up hot spots and cause reburning and spread of fire.

30: Observed Weather for Current Operational Period

Peak Gusts (mph): **15** Max.

Temperature: **94**

Wind Direction: **NW** Min.

Relative Humidity: **48**

31: Fuels/Materials Involved: **7 Southern Rough Palmetto, Gallberry, Titi, pine straw, hardwood understory**

32: Today's observed fire behavior (leave blank for non-fire events):

Smoldering within the interior of the fireline.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Rain within the area. Satilla Distirct Office (ICP) measured .15 inches of rain earlier this afternoon. 7 tenths of an inch was measured just west of the Okefenokee near the Swamp Road south of Waycross. No rain has been measured at the Racepond fire.

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **5-10** Temperature: **94**

Wind Direction: **W** Relative Humidity: **46**

35: Estimated Control

Date and Time:

06/25/2011 1400

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

Continue to complete control line and improve existing ones on the east and south flanks. Secure the Racepond Community and mopup around the Fort Mudge Community. Continue to set up structure protection at the Okefenokee State park and provide structure protection as needed.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**

2. Difficulty of Terrain - **Medium**

40: Given the current constraints, when will the chosen management strategy succeed?

Sustained rain is needed to meet the incident objectives.

41: Projected demobilization start date:

42: Remarks:

Acreage changed due to better mapping on the ground. Daily costs was \$86,361. Total estimated total costs did not go up as much due to better accounting.
